

# SAURABH KUMAR

Ghaziabad, Uttar Pradesh

☎ [+91-9026272421](tel:+91-9026272421) ✉ [saurabh90262@gmail.com](mailto:saurabh90262@gmail.com) in [LinkedIn](#)  [Github](#) </> [LeetCode](#)  [GFG](#)  [Portfolio](#)

## EDUCATION

**ABES Engineering College Ghaziabad**

*B.Tech - Information Technology - CGPA - 7.87*

**2023 – 2027**

*Ghaziabad, India*

## TECHNICAL SKILLS

**Languages:** Java, C, SQL, JavaScript

**Frontend:** HTML, CSS, React.js, Tailwind CSS, Bootstrap

**Backend:** Node.js, Express.js, REST APIs, JWT Authentication

**Databases:** MongoDB, MySQL

**DevOps & Deployment:** Docker, GitHub Actions, CI/CD Pipelines, Vercel, Netlify, Render

**Tools:** Git, GitHub, VS Code, IntelliJ IDEA

**AI Tools:** Codex, Gemini API, GitHub Copilot, Claude

## COURSEWORK

- Data Structures & Algorithms
- Database Management System
- Software Project Management
- Software Engineering
- Operating System
- Machine Learning
- Object Oriented Programming & Concepts (OOPS)
- Full Stack Web Development

## PROJECTS

**TrainExpert - Ticket Sharing Platform** | [MERN](#), [GeoJSON](#), [Node-cron](#) | [Live](#)  | [Code](#)  **March 2026**

- Built and deployed a full-stack ticket exchange platform enabling users to list, discover, and purchase unused railway tickets with secure JWT authentication and OTP-based email verification.
- Designed a geo-based smart search system using the Haversine formula and GeoJSON data, delivering instant alternative ticket suggestions within a 100km radius.
- Automated expired listing cleanup using scheduled cron jobs, improving database efficiency and system reliability.
- Developed a responsive React UI with real-time station autosuggestions, enhancing user experience and usability.

**Hotel Frontier** | [MERN Stack](#), [Node-cron](#), [Google Script](#) | [Live](#)  | [Code](#)  **May 2026**

- Engineered a full-stack hotel reservation platform using React.js, Node.js, Express.js, and MongoDB with secure OTP-based email authentication and protected user sessions.
- Developed a role-based admin dashboard to manage reservations, cancellations, occupancy status, and real-time check-in/check-out operations efficiently.
- Architected an automated email notification system using Google Apps Script to send instant booking confirmations, cancellation alerts, and customer updates in real time.
- Implemented RESTful APIs and optimized backend workflows with **node-cron** scheduled jobs for automated cleanup of expired bookings and stale verification records.

**Photon AI Chatbot** | [JavaScript](#), [Gemini API](#) | [Live](#)  | [Code](#)  **November 2025**

- Developed an AI-powered chatbot integrating Google Gemini API for contextual and intelligent conversations.
- Implemented real-time message streaming and persistent chat history for improved user engagement.
- Designed a responsive UI with theme switching and markdown rendering for enhanced readability.

**Weather Forecast Web App** | [JavaScript](#), [API](#) | [Live](#)  | [Code](#)  **September 2024**

- Built a weather application providing real-time forecasts for global locations using external APIs.
- Displayed key metrics including temperature, humidity, wind speed, and multi-day forecasts.
- Designed a responsive and user-friendly interface using HTML, CSS, and JavaScript.

## ACHIEVEMENTS

- **280+ Questions on Leetcode**
- **155+ Questions on GeeksforGeeks**

## CERTIFICATIONS

- NPTEL Programming in Java (IIT Kharagpur)
- NPTEL Introduction to Internet of Things (IIT Kharagpur)
- Full Stack Web Development (Apna College)
- Oracle Cloud Infrastructure 2025 AI Foundations Associate (Oracle University)
- HackerRank Problem Solving
- GeeksforGeeks 160 Days Problem Solving
- DSA with Java (Apna College)
